

MICHAEL MCCAMY

407-488-0227 | michael.mccamy@ufl.edu | github.com/michaelmccamy

EDUCATION

University of Florida (UF) – Gainesville, FL

May 2027

Bachelor of Science in Computer Science | GPA: 3.91/4.00

Relevant Coursework: Data Structures and Algorithms, Introduction to Software Engineering, Information and Database Systems, Introduction to Computer Organization, Operating Systems

RELEVANT EXPERIENCE

Fuzzy AI – Singapore

June 2026 – Present

Software Engineer Intern

- Built and shipped **100+** bug fixes and features in a production TypeScript/React codebase, tracked in Linear.
- Onboarded and interviewed **15+** users and analyzed PostHog usage data to surface and fix workflow pain points.
- Translated user feedback into prioritized engineering work, owning changes from proposal through deployment.

UF Space Systems and Design Club – Gainesville, FL

August 2024 – May 2026

CanSat Flight Software Developer

- Collaborated with a **4-person** team to plan and develop flight software for a miniature satellite.
- Designed a graphical interface to track real-time telemetry data during launch and descent.
- Presented the flight software portion of Preliminary and Critical Design Reviews to the CanSat Competition Board.

PROJECTS

MediLens – Clinical Documentation Validation Tool

Python, Anthropic API (Claude), Streamlit

- Built a pre-claim denial-prevention tool that validates clinical notes against ICD-10-CM codes and payer policies, returning grounded code recommendations, documentation gaps, and a denial-risk score.
- Engineered a code-level verification layer that mechanically re-checks every LLM claim (cited note spans, candidate codes, and policy clauses) so no ungrounded recommendation can reach output.
- Implemented PHI screening, effective-dated knowledge retrieval, and an append-only audit store making every recommendation fully reconstructable.
- Wrote **163** automated tests, including regression tests that fail on upcoding or fabricated citations.

Task Manager REST API

Java, Spring Boot, PostgreSQL, React

- Built a full-stack task management app with a Spring Boot REST API, PostgreSQL database, and React frontend supporting real-time task creation and updates.
- Designed the relational schema and validated all CRUD endpoints with Postman test suites.

LEADERSHIP & INVOLVEMENT

MentorGNV – Stephen Foster Elementary School, Gainesville, FL

January 2025 – April 2025

Volunteer Mentor

- Tutored elementary school students in mathematics and science through weekly one-on-one sessions.

ADDITIONAL INFORMATION

Skills: Python, TypeScript, JavaScript, Java, C/C++, SQL, R, MATLAB, HTML/CSS

Frameworks & Tools: React, Spring Boot, Streamlit, Firebase, PostgreSQL, Git/GitHub, GitHub Copilot, Claude Code, Claude API, Linear, PostHog, Postman, Unity

Practices: Agile/Scrum, REST API design, LLM application development

Honors: UF Dean's List (6x, August 2023 – Present); AI Fundamentals and Applications Undergraduate Certification (In Progress)
